

## Product Code

UTCM-1100 Curing Cabinet 1000 L

Models for 220-240V 50-60 Hz, 1 ph	UTCM-1100
Models for 110-120V 60 Hz, 1 ph.	UTCM-1100-N

## Standards

EN 196-1; ISO 679

The UTCM-1100 Curing Cabinet is used for curing of cement, concrete or other cement based mortar specimens. The curing cabinet provides  $(20 \pm 1)^{\circ}\text{C}$  temperature and over 90% RH humidity. Internal chamber is made of stainless steel. The temperature is maintained by a heater and cooler unit which are supplied complete with cabinet.

The humidity and temperature can be controlled and monitored on the digital control unit.

UTCM-1100 Curing Cabinet is also supplied complete with six displaceable shelves.

In order to record temperature, humidity and time data simultaneously, the communication module (UTCU-4940) should be ordered separately.

Internal Dimension	1140x680x1370 mm
External Dimension	1400x800x2100 mm
Weight (approx.)	200 kg
Power	1200 W
